01 PergOzy

Aluminum Smart Motorised Louverd Pergola

About PergOzy

Unique outdoor space

- Smartly angled louvers automatically close to shield you from rain, keeping your outdoor space dry and usable in wet weather.
- Adjustable open louvers allow you to fine-tune airflow based on wind conditions, ensuring comfort without compromising structure.
- With up to 80% openness, the pergola promotes excellent natural ventilation, preventing heat buildup under the roof.
- Easily adjust louver angles to provide full shade or partial sunlight, effectively reducing UV exposure and heat while maintaining brightness.

Pergola Quality

Varied open/close options for ideal sunshade and heat insulation.

Varied open/close options for ideal sunshade and heat insulation.

Rainproof structure with IP67-rated electrical components for full outdoor resistance.

Wind resistant up to 80 km/h.

Aesthetic design with the strength to support ceiling fans or heaters.

Customizable in size, colour, and upgrade according to the venue

Fire protection due to aluminum magnesium silicon alloy body, compared with wood base product.

Advantage of Smart Integration and Design

Products comparison

When it comes to enhancing your outdoor living space, **PergOzy stands out as the smarter**, **more stylish**, **and more versatile alternative to traditional patios and other pergola brands** – offering premium **features, modern design, and long-term value that competitors simply can't match**.

- Adjustable Blade System Take full control of sunlight, airflow, and shade with motorised or manual louvre blades — a major upgrade from fixed-roof patios.
- Modern Architectural Design Sleek appearance, minimalist lines add a contemporary edge to your outdoor space, far beyond the look of standard patio structures.
- All-Weather Protection PergOzy's closing blades offer reliable protection from rain and harsh sun, making it functional year-round unlike open or static patios.
- Integrated Features (Optional) Add lighting, heating, and water drainage with ease features typically unavailable or costly to add to standard patios.
- **Premium Build Quality** Crafted from high-grade aluminium with **weather-resistant** finishes for long-lasting durability, unlike timber or basic steel patios.
- PergOzy is 100% Australian made from design to manufacture. This local production gives us a significant advantage, allowing for a fast 2–4 weeks lead time from site measurement to installation.

PergOzy design

Precise Actuator

High quality 6063 High strength aluminum-Mg-Si alloy, with powder coating on the surface, rust-free corrosion-free, maintenance-free, safe and environmentally friendly, and last more than 20 years.

Double-layer Blades

High quality 6063 High strength aluminum-Mg-Si alloy, high density powder coating on the surface, rust-free corrosion-free, maintenance-free, safe and environmentally friendly, and can be used for more than 20 years.

Blades Connection

Our IP67-rated actuator offers reliable, weatherproof control for opening and closing blades and outdoor zipper blinds, ensuring smooth, synchronized operation of your gazebo with remote convenience.

Quick Drainage System

Our double-blade louver features a discreet groove for optional lighting, which can be seamlessly covered if not needed. The hollow profile allows for further insulation by polyester, and the reinforced structure for strength to supports any additional accessories. A minimalist design that can be fully integrated with architectural aesthetics

Our powerful design

Composite material

6063 Aluminum Alloy and coating layers

Basal Layer: high temperature dusting layer

Tungsen Carbide Layer: High strength reinforced magnesium silicon alloy

Water-rust resistance layer: Enhanced corrosion resistance

Chemical Stability: Prolong color corrosion resistance

Modular structure, site assembly

Crafting innovation with simplicity and elegance in design

Blade: Precision prefabricate double blade

Smart Design for compact storage: Design with truck friendly dimension for easier package transportation

Assembly: Smart interlocking design between components allows our team to complete onsite installation quickly and efficiently.

Louvers

80% Openess factor from double-blade louvers Open angle: more than 90° to track the sun movement all day Light customisation: Extra groove to add on light for further customisation Symmetrical Design: Easy for replacement and assembly

Compound design

- Elegant Standard Pergola A timeless 4-post design that adds style and shade to gardens, poolside areas, or any open outdoor space.
- Flexible Connected Pergola Ideal for large or corner spaces, multiple pergolas can be linked in a straight line or L-shape to create a spacious, seamless outdoor zone.
- **Space-Saving Wall Pergola** Attached directly to a wall with fewer posts, this sleek option enhances balconies or narrow areas with a modern, open look.
- Flexible Design Dimension Our pergola system is designed with flexibility and durability in mind, offering a modern solution for outdoor spaces. Key specifications include:

Blade length: up to 5 meters Extension length: up to 8 meters Maximum total height: 3.4 meters Clearance height: 3 meters

Every Detail Matters – Tailored to Your Every Option.

Heater

Power: 4 settings 240W/960W/1440W/2400W. Waterproof: IP65 water protected standard. Mounting option: wall or ceiling mount. Manual: LED display panel with remote control. Exra features: Motion sensor and child lock option. Product size (WxHxL): 980 x 162 x 215 mm.

Rain Sensor

Power: 100-240V~0.5A 50/60 Hz. Waterproof: IP67 water protected standard. Rain intensity regulation: 1-100 mm/Hr. Light intensity regulation: 0.2-10 Klux. Wind intensity regulation: 10-50 km/Hr. Product size (WxHxL): 100 x 230 x 120 mm.

Power: Solar power. Waterproof: P67 water protected standard. Rain intensity regulation: 1-100 mm/Hr.

Remote Control

Power: 4 settings 240W/960W/1440W/2400W. Waterproof: IP65 water protected standard. Mounting option: wall or ceiling mount. Manual: LED display panel with remote control. Exra features: Motion sensor and child lock option. Product size (WxHxL): 980 x 162 x 215 mm.

Ceiling Fan

Power: 240 V at 75W, AC motor. Waterproof: IP67 water protected standard. Blade material: ABS Plastic. Blade detail: 3 blades at pitch angle 19°. Product size (WxHxL): 36" (912 mm).

Flexible LED Light

Power: DC 24 V at 10W. Waterproof: IP67 water protected standard. Color Temperature: Single/CCT/RGB. Lamp Luminous Flux: 300-1050 (lux).

Roller blinds accessories

Sunscreen Fabric

Composite: 20% Polyester + 80% PVC Thickness: 0.54 mm +5%

Breaking Strength:

Warp: 1090 N/ 5 cm Weft: 1040 N/ 5 cm

Opacity:

1%: Reducing heat, blocking UV, sun and wind.

3 %: Blocking UV, sun, and wind.

5 %: Blocking wind.

Motorise roller blind

Material: Aluminium extrusion.Width: Maximum width 6 meter.Height: Maximum height 3.8 meter.

Construction features:

Compact steel design: A simple, refined design for a sleek, modern look.

Seamless cover: Front and rear seams create a smooth, aesthetoc appreance.

Precision fabric guide: Duel nano strips ensure smooth, vertical zipper alignment for flawless operation

Strong rail: Aluminum rail with hidden welds and screw for a clean finish.

Motorised Roller Blind
